ET.CYCLE

Powered By **Das-Kit**

The Das-Kit X15F motor is long lasting, efficient, and powerful. Combined with the sleek, fully-integrated yet large capacity battery, our ET.Cycle bikes give you the ultimate feeling of freedom. Ride further, faster, without breaking a sweat.

WHAT IT MEANS TO BE POWERED BY DAS-KIT

The patented design of the **I5/I6** and **T6/T7** controllers allows for easy cable management that runs through the bike's frame. Without the jumble of cables like other e-bike controllers, Das-Kit keeps you stress free with this low-maintenance design.

Powered By **Das-Kit**

- Rated Power: 250W
- Voltage: 48V
- Torque Rating: 70Nm
- Weight: 3.2kg

At 250 Watts with a peak wattage topping off at 750 Watts, the Das-Kit hub motor not only offers powerful torque but with its German designed efficiency it does all this weighing no more than 3.2kg.

- 720 models : 48V 15Ah, 720WH
- 1000 models: 48V 21Ah, 1008WH

Combined with a powerful motor, the Das-Kit's battery really stands out and makes ET.Cycle bikes stand out in the vast sea of electric bicycles. With lab tested ranges of up to 200km, even in real world conditions you will never worry about having enough power to make the trip back home.

ABOUT US

MAKE YOUR OWN RULES

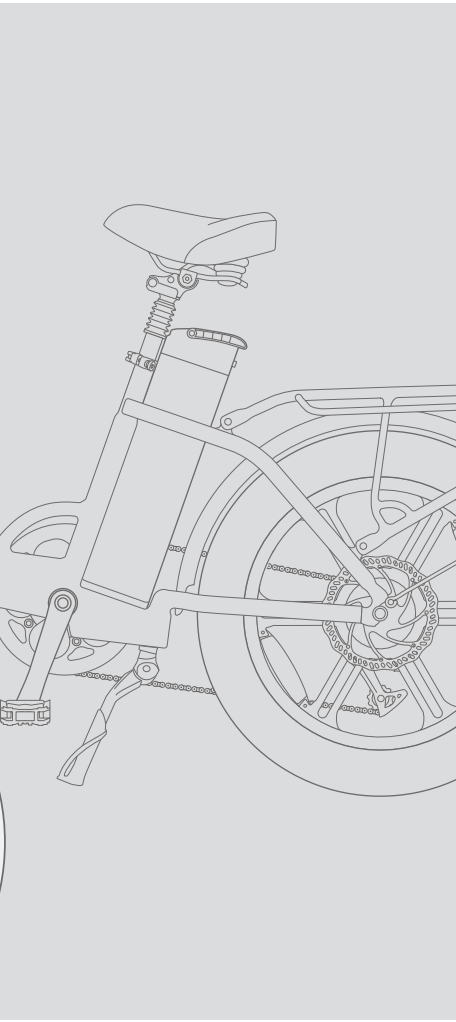

At **ET.Cycle**, we've taken the spirit of American motorcycles and put it into the heart of our fat tire electric bikes. Our goal is freedom across all terrains-city, sand, trail, snow. We've engineered strong frames and powerful drive systems and motors to open up the city and the country to your imagination. Give your attitude an extra charge.

THE SPIRIT OF AMERICAN MOTORCYCLES

DEVELOPING FAT-TIRE EBIKES SINCE 2014

ET.Cycle is the rebellious child in our family of ebikes, full of energy and the passion to explore the great outdoors. Founded in 2014 in Hanover, Germany, ET.Cycle took a decade's worth of R&D expertise, innovation, technology and did what others at headquarters would not dare to do- we made amazing fat tire ebikes out of it. With longer battery life, better built frames, and after-sales service surpassing the competition, ET.Cycle is here to stay.

DIRECT TO YOU

ET.Cycle controls its vertical supply chain, therefore we can offer the highest quality bikes and components to you without the additional retail costs of many electric bike brands. We oversee our own R&D, procurement, manufacturing and sales - meaning we can deliver better designs, stronger components at a faster rate and provide the most competitive prices to our consumers. It's not easy. But it's smarter. Our frames, electronic components and motors are produced in our own production facilities to the highest German standards.

WHEEL SIZE 20"

SUITABLE FOR RIDERS 157CM +

*Sizing may vary for each individual. Please refer to the stand over height in the chart below to find the best fit for you.

F720 / F1000 20"

A. Stand Over Height	50.8 cm
B. Wheel Base	114 cm
C. Frame Size	41.5 cm
D. Min / Max Seat Height	84/103 cm
E. Reach	65 cm
F. Overall Length	170 cm

SPECS OVERVIEW

ET.CYCLE F1000 20"

ELECTRICAL PARTS

	Motor	Das-Kit, G20 Integrated rim motor, 48V 250W, max speed 25km/h
	Display	Das-Kit, C7, LCD, 6 levels
	Battery	Das-Kit, B1M-4821, 1008WH, 48V 21Ah, Panasonic Cells
	Charger	Das-Kit, DC483US, 48V 3A
	Range	150 km with pedal assist, 90 km with throttle

	Top Assist Speed	Up to 25km/h
	Pedal Assistance	Cadence Sensor

	Frame	Alu. 6061, 16 inches, 20" fat wheels
	Fork	RST, Guide-TNL 20, with hydraulic suspension and lock system

	Brakes	F/R.: Tektro HD-E350 Hydraulic Disc Brake System with L&R Brake Sensors. F: 180mm rotor R: 180mm rotor
---	--------	--

BICYCLE PARTS

	Saddle	Selle Royal
	Handle Grips	Selle Royal, JF510, Brown
	Tire	CST, CTC06, 20x4.0
	Crank	Das-Kit, CF52AA, 52T
	Pedal	Wellgo, F178, foldable pedal
	Freewheel	8 speed, 11-32T
	Rear Derailleur	L-TWOO, RD-V5008-M-2, 8 speed

WEIGHT

	Net weight (with battery)	34 kg
	Battery Weight	4 kg
	Max Load	140 kg

ET.CYCLE F720 20"
